our website.

# Höckh

  
**Parts Cleaning Technology**

Your road to

Industry 4.0

## Three principles of our success

A good business deal always  
has two partners.

Quality is when the customer  
returns, not the product.

We are a team –  
and together we are strong.

# HÖCKH SMART PROCESSING

Advanced intelligence in cleaning

# INDUSTRY 4.0 FOR PARTS CLEANING

Count on state-of-the-art, count on systems by Höckh.

## Data recording

Using state-of-the-art measuring systems, quality variations in cleaning process and system status can be recorded, analysed and regulated in detail.

- ✓ Data-Log
- ✓ Process Management
- ✓ Energy Management
- ✓ Consumption Manager
- ✓ Advanced monitoring

## Network connection

Various interfaces enable internal and external connections to the recording of operating data, recipe management, process control, as well as to fault diagnosis or analysis.

- ✓ OPC / UA Connect
- ✓ Intranet
- ✓ ERP Connect
- ✓ Easy Order
- ✓ Remote Service

## Operator guidance

Through intelligent analysis of the system status, the operator receives exact recommendations for action. They can also request specific advice.

- ✓ Pre Warning System
- ✓ Operator assistance
- ✓ Predictive maintenance
- ✓ User-Assistance
